Executive Summary

Overview

This report presents a comprehensive business analysis of the provided dataset. Key metrics, trends, and actionable recommendations are highlighted to support data-driven decision-making.

Key Findings

- The average actual price of Amazon products is \$5445, with an average discounted price of \$3125, indicating a significant discount of 47.69% on average.

Key Recommendations

✓ **Analyze Home Improvement category discounts. Optimize pricing for high-end products. Review 213 outlier-priced items.**

1. Analyze The Pricing Strategy Of The Amazon Products. First, Convert The Discount

Analyze the pricing strategy of the Amazon products. First, convert the discounted price and actual price into numbers. Calculate the average actual price and the average discounted price. What is the average discount percentage offered? Create a scatter plot comparing the actual price versus the discounted price to see if more expensive items get larger discounts.
