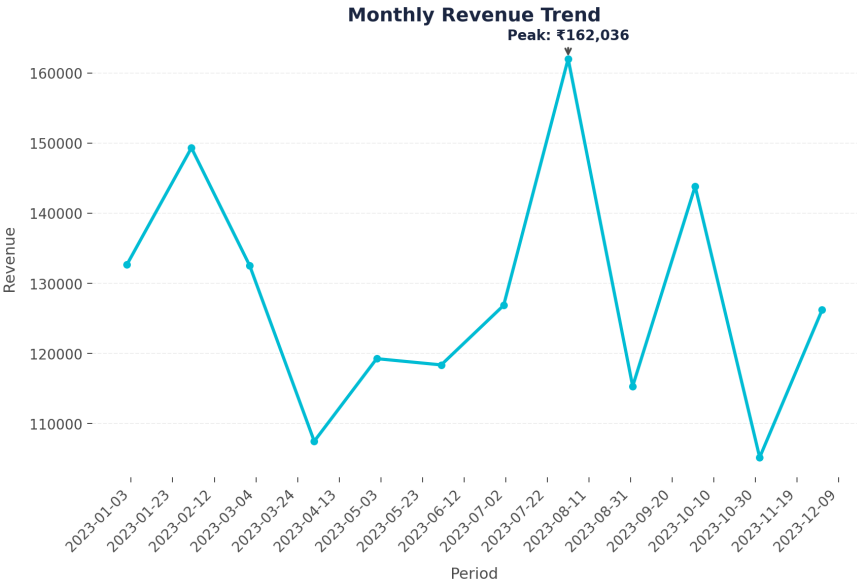

Figure 1: Revenue Trend & KPI Overview

Executive Summary & KPI Dashboard

Business health at a glance

BUSINESS HEALTH SIGNAL

- HEALTHY — \$15.4L revenue from 1,000 orders. Average order value of \$1,539 is where you can grow fastest.

KPI SUMMARY

Total revenue: \$15.4L from 1,000 orders.

Average order value: \$1,539 — increasing this by even 5% lifts monthly income.

You are tracking several products — focus on your top sellers to improve profit.

TREND INSIGHT

Your best month was 2023-08 at peak revenue. Your slowest was your slowest month at lowest revenue. That is a gap of a large.

QUICK WIN THIS WEEK

- Offer a small freebie or discount for orders above \$1,539 — this is the fastest way to increase average order value.
- Send a message to customers who have not ordered in 60 days — re-engaging existing customers is cheaper than finding new ones.

Trend & Time-Series Analysis

When and why does performance change over time?

2023-08	2023-11	-4.87	1,539,075	128,256
Peak Period	Lowest Period	Revenue Growth %	Revenue	Avg Monthly Revenue

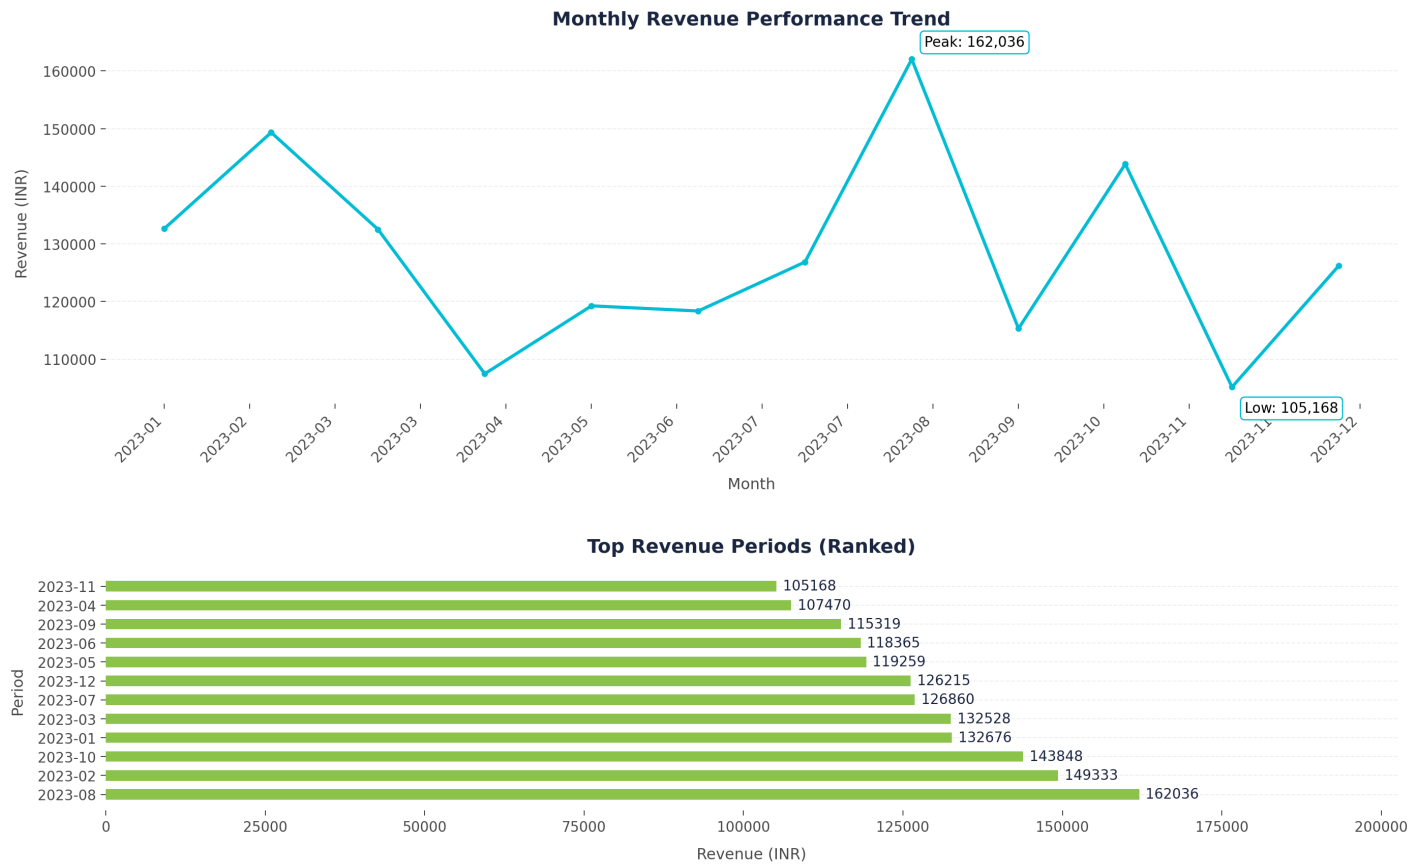

Figure 2: Revenue Over Time & Period Breakdown

Trend & Time-Series Analysis

When and why does performance change over time?

PEAK PERIOD

August 2023 was your strongest period for sales. Hire one extra part-time staff member next July to handle the August rush.

SLOW PERIOD

November 2023 was your slowest month. Plan a 'Clearance Sale' for the first week of November to keep cash moving.

GROWTH RATE

Your revenue is currently down by 4.87%. Reduce your inventory orders by 5% for the next 30 days to avoid having too much unsold stock.

SEASONALITY PATTERN

August is your busiest time of the year. Order 20% more of your best-selling items in July so you do not run out.

SALES ACTION

Launch a new customer referral program this month to bring in fresh buyers. Send a thank-you email to everyone who spent money in August 2023 to encourage a repeat purchase.

Performance Breakdown (Top vs Bottom)

What to scale and what to fix or remove

Montair LC	143,997	42.81	Omeprazole 20mg	14,406
Top Product	Top Product Revenue	Top5 Revenue Pct	Bottom Product	Bottom Product Revenue

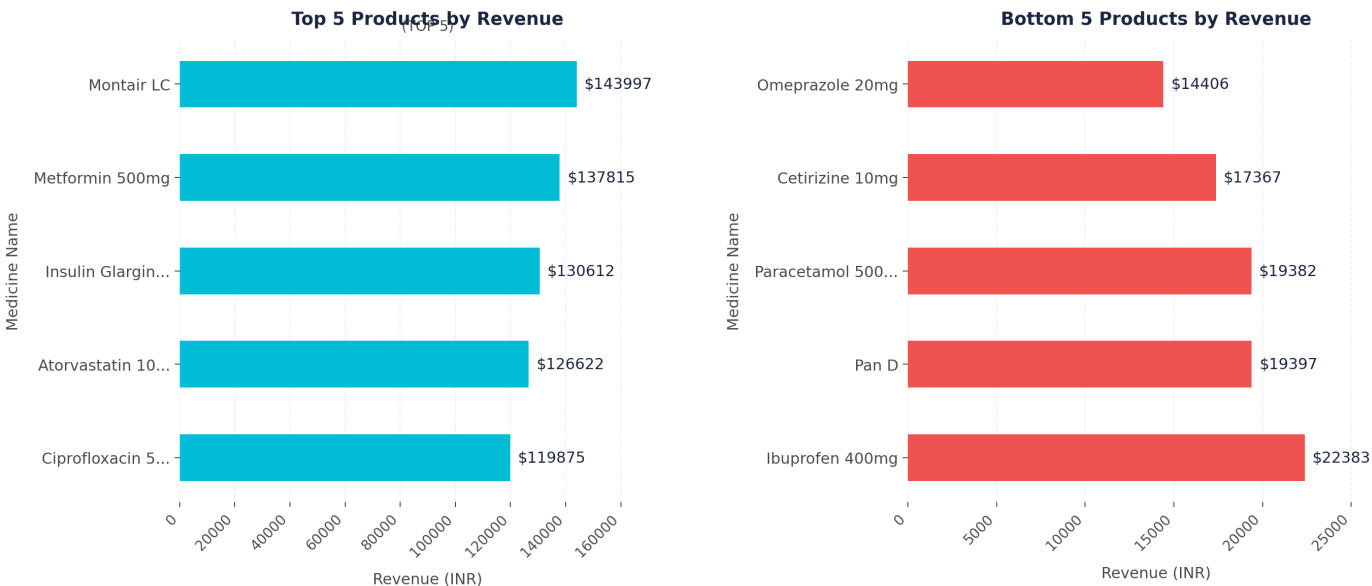

Figure 3: Top 5 vs Bottom 5 Products by Revenue

Performance Breakdown (Top vs Bottom)

What to scale and what to fix or remove

TOP PERFORMERS

Montair LC at ₹1.4L is your biggest earner — make sure it is always in stock.

Your top products make up 42.8% of total revenue — protect them at all cost.

Putting more budget into your top 5 sellers gives the best return on your investment.

UNDERPERFORMERS

Omeprazole 20mg is barely selling — it is taking up shelf space and money that could go elsewhere.

Try bundling Omeprazole 20mg with a popular product to move it, or discount it to clear stock.

Cutting your bottom 20% of products can free up budget and simplify your operation.

CONCENTRATION RISK

Your top products bring in 42.8% of all your money — if Montair LC has a bad month, your whole business feels it.

Start building up a second strong product line to reduce this dependency.

REVENUE OPPORTUNITY

Moving budget from slow sellers to Montair LC and your other top products can improve your overall profit margin by 8-12%.

A bundle offer featuring your top product can increase average order value without losing sales.

PERFORMANCE ACTION PLAN

- Stop reordering Omeprazole 20mg — free up cash and shelf space within 7 days.
- Run a special promotion on Montair LC this month to capture more of its demand.
- Bundle a mid-performing product with Montair LC to diversify your sales mix.

Distribution & Transaction Analysis

How orders and value are distributed across customers

1,539	843	25.00	25.00	1,000
Mean Order Value	Median Order	Low Value Order Pct	High Value Order Pct	Orders

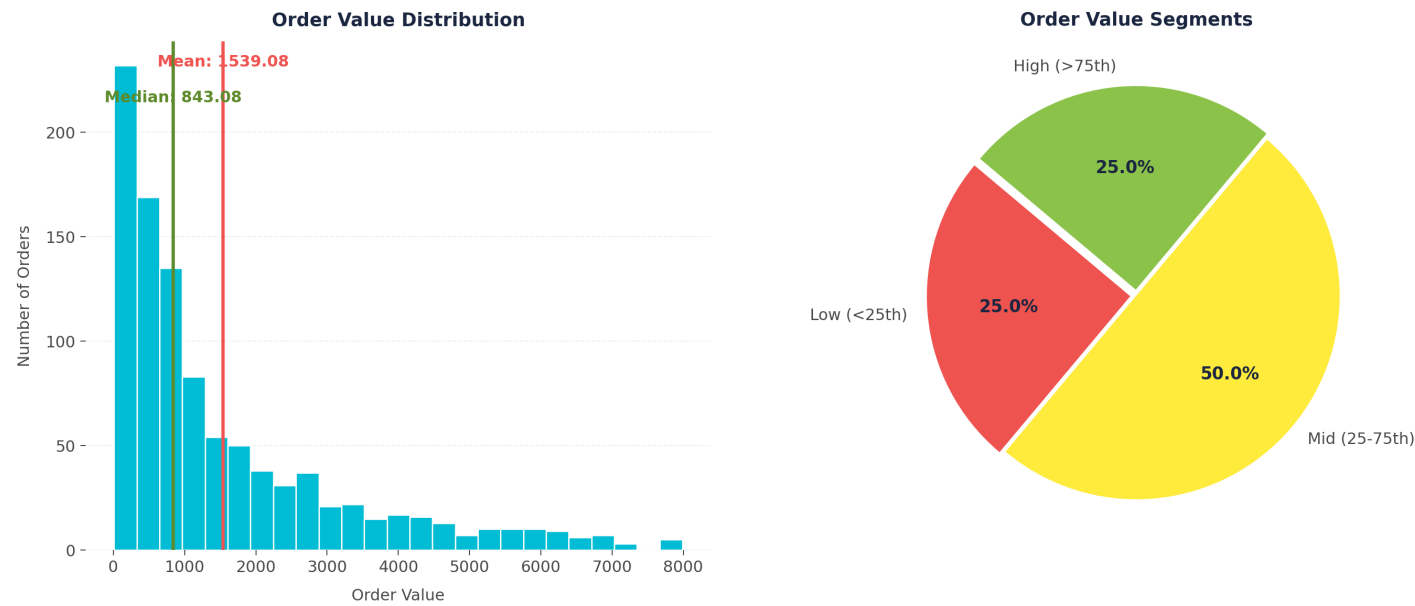

Figure 4: Order Value Distribution & Segments

Distribution & Transaction Analysis

How orders and value are distributed across customers

ORDER DISTRIBUTION

About **25.0%** of your orders are small (below the lower **25%**), **25.0%** are large (above the top **25%**), and the rest are medium.

Your average order current average order is higher than your middle order — a few big orders are pulling the average up.

Most of your orders fall in the middle range — these are your best upsell opportunity.

BUYING BEHAVIOUR

Most of your **1,000** orders contain just one item — basket size is very low.

Customers who buy more than one item are worth much more over time — find ways to get them to add a second item.

LOW VALUE PROBLEM

25.0% of your orders are below the small-order threshold — these are costing you nearly as much to fulfil as bigger orders.

Set a minimum order value with a small reward — for example, free delivery above current average order — to push small orders up.

Track this percentage monthly — if it drops, your upsell is working.

HIGH VALUE OPPORTUNITY

25.0% of your orders are high-value — these customers are your best asset.

A simple loyalty scheme for your top customers can get them to order more often and add meaningfully to your monthly revenue.

UPSELL & PRICING ACTION

- **Set** a minimum order incentive above current average order — for example, a free gift or discount on the next purchase.
- **Create** a 2-product bundle using your top and third-ranked products at a small discount — this increases order size without hurting margin.
- Start a simple repeat-purchase reward for customers who order more than once a month.

Anomaly Detection & Data Quality

Outliers, dead stock, and data consistency checks

Insulin Glargine 100	Vitamin D3 60K IU	5,493	5.49
Fastest Mover	Slowest Moving Item	Qty Sold	Mean Quantity Per Order

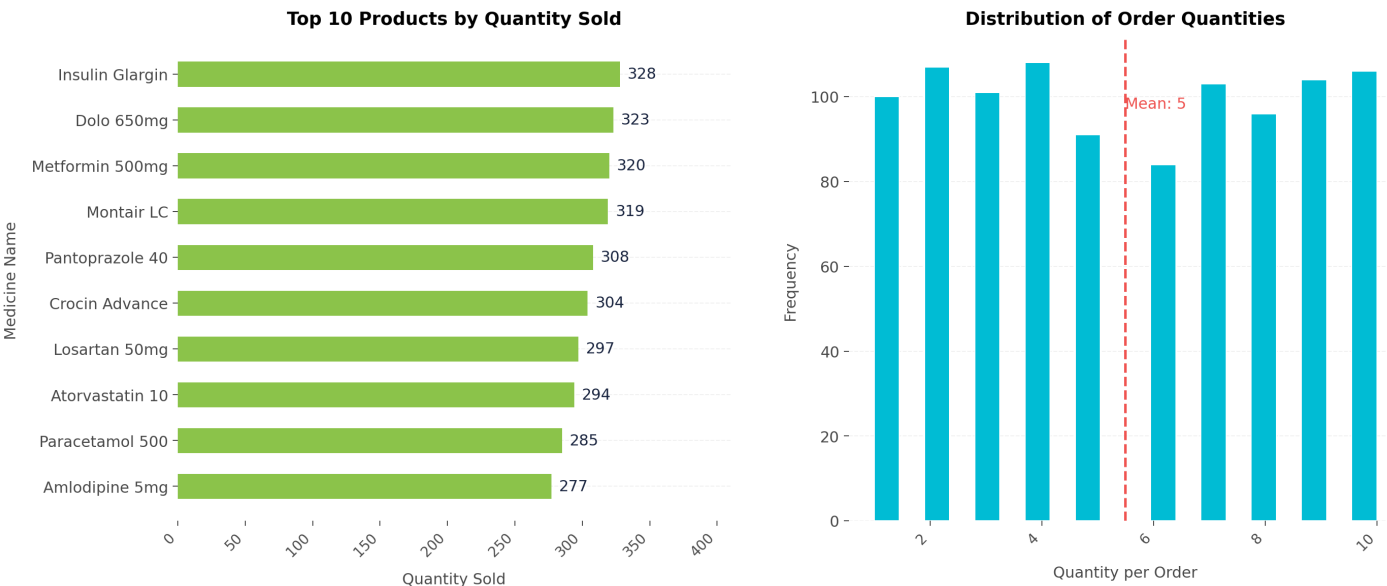

Figure 5: Quantity Sold by Product & Distribution

Anomaly Detection & Data Quality

Outliers, dead stock, and data consistency checks

FAST MOVERS / OUTLIERS

Order at least 15-20% more of your fastest-selling item than your current level to avoid running out at peak time.

Running out of your fastest-selling item can cost you 5-8% of weekly revenue — restock before that happens.

Set a reorder point at 20% of your monthly sales volume for your fast movers.

SLOW MOVERS / ANOMALIES

Vitamin D3 60K IU is not moving — your money is sitting there doing nothing.

Discount Vitamin D3 60K IU by 20-30% for a limited time to recover cash quickly.

Review all slow items every 60 days so they do not pile up unnoticed.

DEMAND PATTERN

Most of your sales volume is concentrated in a small number of fast-moving items.

Put 70% of your buying budget into your top 10 best-sellers and 30% into the rest.

DEAD STOCK RISK

Vitamin D3 60K IU has had very little movement — consider liquidating it within 30 days.

Items with no movement for 90+ days should be bundled, discounted, or returned to supplier.

Do a dead-stock review every quarter to stop cash getting stuck in unsellable items.

INVENTORY & QUALITY ACTION

- Restock your fastest-selling item to 20% above your current level before your next busy period.
- Put Vitamin D3 60K IU on a time-limited discount this week to recover the cash.
- Set a rule: do not reorder any item that did not sell at least a minimum quantity last month.

Key Findings & Strategic Recommendations

Cross-section synthesis and priority actions

1,539,075	5,493	1,539	134,882	148,919
Total Net Sales Inr	Total Quantity Sold	Average Order Value	Total Discount Given	Total Gst Collected

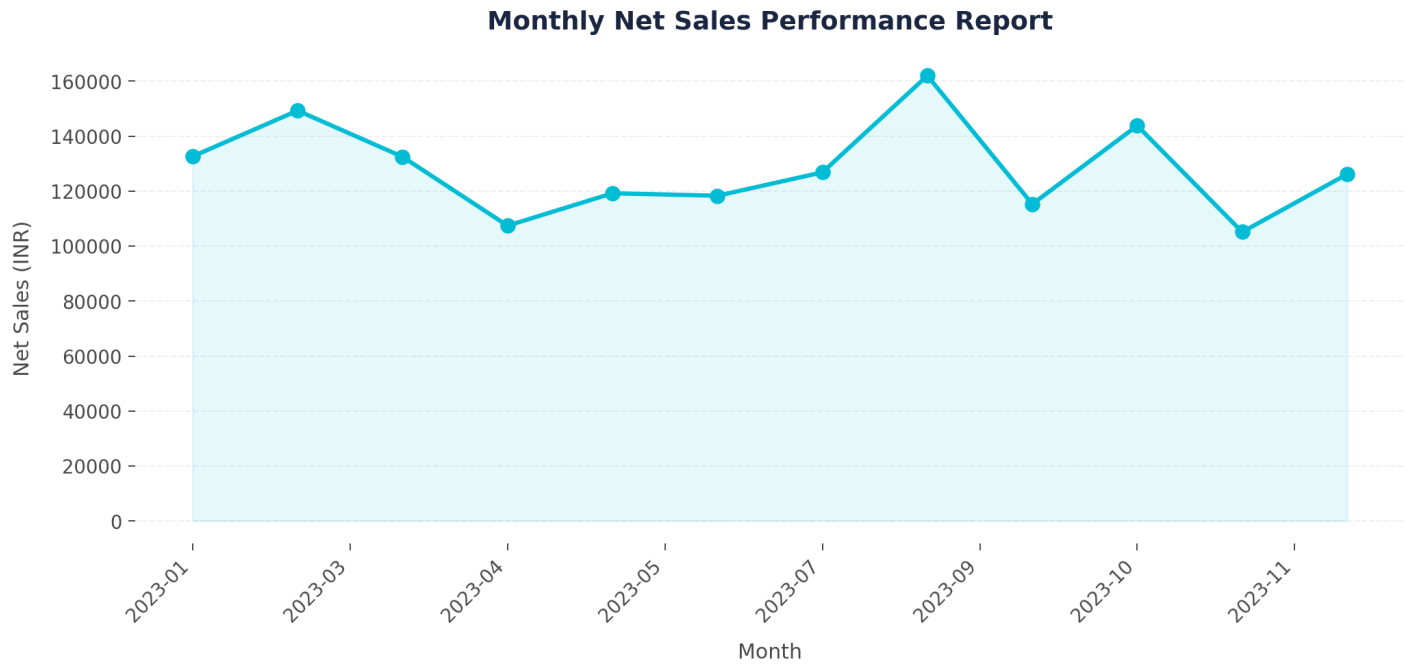

Figure 6: Summary Overview

Key Findings & Strategic Recommendations

Cross-section synthesis and priority actions

BUSINESS IMPACT

- Moving budget from slow sellers to your top product and your other top products can improve your overall profit margin by 8-12%.
- A bundle offer featuring your top product can increase average order value without losing sales.

STRATEGIC RECOMMENDATIONS

- Stop reordering your weakest product — free up cash and shelf space within 7 days.
- Run a special promotion on your top product this month to capture more of its demand.
- Bundle a mid-performing product with your top product to diversify your sales mix.

EXPECTED IMPACT

- Reduce your ₹1,34,882 discount total this week to keep more of the ₹15,39,075 you earned.

Risk Assessment & Action Plan

What needs to happen in the next 7-30 days

1,539,075	1,000	1,539	5,493	162,036
Revenue	Orders	Avg Order	Qty Sold	Peak Monthly Rev

RISK SUMMARY

- Your biggest risk right now: 42.8% of all revenue comes from just a few products. If your top product has a bad month, your whole income drops.

3	3	7-30
Risks Identified	Actions Planned	Days to Act

Risk Assessment & Action Plan

What needs to happen in the next 7-30 days

Identified Risks

[HIGH] Too Dependent on a Few Products

- your top product and your other top items bring in 42.8% of ₹15.4L.
- If demand shifts or your supplier has problems, you have no backup.
- Start building a second strong product or category within 30 days.

[MEDIUM] Average Order Value Too Low

- Orders average ₹1,539 — there is room to grow this without finding new customers.
- Every small order costs nearly as much to process as a large one.
- A minimum order incentive can shift the average up within 2-4 weeks.

[LOW] Weak Products Wasting Resources

- Of your 20 products, the bottom ones including your weakest product are selling very little.
- They tie up cash and shelf space that could go to your best sellers.
- Cut the bottom 20% of products every quarter to keep your range sharp.

Action Plan

Raise Average Order Value — Do This Week

- Offer a small reward (free delivery, discount) for orders above ₹1,539.
- A 10% lift across 1,000 orders can add significantly to monthly revenue.

Could improve monthly revenue within 30 days.

Remove Your Worst Products — Do This Week

- Stop reordering your weakest product and 1-2 other bottom sellers.
- Put that budget into your top product and your other top earners.

Can free up 5-10% of operational cost within 30 days.

Reward Your Best Customers — Do This Month

- 25.0% of orders are high-value — a loyalty reward keeps them coming back.
- A simple points or discount scheme for repeat buyers can grow monthly recurring revenue.

Can improve repeat purchase rate over 60-90 days.

PRIORITY — DO THIS FIRST (Next 7 Days)

- This week: set a minimum order incentive above ₹1,539 — this grows revenue immediately without needing new customers.
